

WAVE™

Win Against Violence

Benefits

- Best practices
- Save lives
- Reduce liability

As school and workplace violence continues to rise, the need to train personnel to handle these incidents is becoming increasingly critical. "Win Against Violence" teaches schools, police, fire, EMS, faculty, corporate, and organizational officials on how to both prevent and respond to such a tragedy.

The first few minutes are critical. Many lives can be saved by training key personnel in critical immediate action drills. Due to our extensive background as members of FBI Hostage Rescue Team, National School Safety Center and D.A.R.E., TotalSecurity.US is uniquely qualified to teach these fundamentals.

Description

Thomas Payzant, Superintendent of Boston Schools, Former US Undersecretary of Education and Former Superintendent of San Diego, rates TotalSecurity.US' course "Extremely Valuable." and Paul Evans, former Commissioner of the Boston Police Department, rates our training as "Outstanding Training."

"Win Against Violence" (WAVE) is a "turn key" 100% deliverable program that can prepare an organization and prevent immeasurable tragedy. No matter where you are now in your school, university or workplace safety program, WAVE can dramatically improve your prevention and response to violence.
